

Generation 2 on the original development panel

32 paired cases · existing exposed development data · selected after 5 search cases

◆ Original seed ● Generation 2
A Program means

B Paired differences

95% intervals: paired episode bootstrap; panel A escape uses separate-arm Wilson intervals (post hoc).

Panel B escape: constant outcomes give a degenerate empirical interval, not certainty about population effects.

Map accuracy reconstructs the current world on different trajectories; it is not a future-prediction comparison.
