

RUN1 usage scopes · experiment calls and project work kept separate

A Uncached input + output

B Cached input

Experiment snapshot: 2026-10-09T01:55:18 UTC; supervision: 2026-10-09T01:47:45 UTC.

1 experiment call(s) lack reported usage. Supervision covers four identified conversation sessions; experiment sessions are excluded.

Supervision is a metadata delta from the last pre-start report; boundary-spanning events cannot be apportioned.

Active-turn/unreported service work is absent. Reasoning output is included once. These values are neither allowance nor charges.
